

SOLIS™ EAF-275
Solar-Powered Faucet

Advanced Thinking In Water Technology

SLOAN®

Introducing the Sloan *SOLIS*TM

The new *SOLIS*TM EAF-275 Series solar-powered faucet is the latest addition to Sloan Valve Company's line of advanced energy-efficient water conservation solutions. Combining environmentally sound technologies with leading-edge electronics, *SOLIS* is designed to deliver continuous energy and water savings, while reducing operating and maintenance costs.

From Light Comes Water

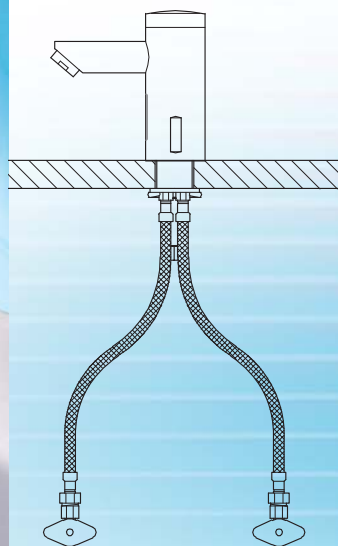

Sloan's *SOLIS* solar-powered faucet is a breakthrough in design and function that transforms light into power. Utilizing any available light, even artificial light, the *SOLIS* out performs lesser faucets while providing the ultimate in water conservation.

With a standard 0.5 gpm spray head, *SOLIS* conserves water while utilizing renewable energy, making it ideal for any LEED® project or design that calls for style and sustainability.

SOLIS' Power Supply is an ingenious combination of photovoltaic technology and a conventional lithium battery system. By allowing the photo cell to supplement the battery, *SOLIS* effectively triples the battery life. This means less frequent need to change and dispose of batteries. *SOLIS* represents the future of electronic plumbing technology.

EAF-275 Solar-Powered Faucet

FEATURES

BENEFITS

Solar Energy Module

Utilizes any light source efficiently
No need for natural/daylight

0.5 gpm/1.9 Lpm aerator

Regulates water flow

Electronic sensor

Automatically turns water on/off

Integral temperature control

Option allows user to adjust water temperature

Modular one-piece construction

Above deck

6V Lithium Battery

Long-lasting power source

Multiple Options

Including: trim plates, temperature mixing and *i.q.-cliq™* for advanced faucet controls
