

Power Solutions for Gamers

Energizer® has a variety of power solutions for gamers who want to take their video game experience to the next level with longer playtime and more power for their wireless gaming accessories.

Energizer® Power & Play™ charging systems are designed to keep gamers ready for action with back-up power that keeps controllers charged. Power to Play is designed specifically for the Nintendo® Wii® Remote™, the Nintendo® Wii® Fit™, the Microsoft® XBox 360® and the Sony® Playstation® 3 game controllers.

With ***Energizer® Advanced Lithium***, gamers are able to enjoy extended battery life and lighter weight construction – 33 percent lighter than ordinary alkaline. Now the official battery of RockBand 2™, ***Energizer® Advanced Lithium*** powers wireless gaming accessories up to 20 hours longer* appealing to all gamers who are eager to play hard, play long and move often.

*Versus Energizer® MAX®. AA only. Results vary by play and/or usage patterns.
