

The *Energizer®* Hard Case® Tactical™ line of lights is designed to meet the lighting and light discipline needs of military, law enforcement and first responder personnel. Each light's design is based on extensive research and development and feedback from tactical professionals in the field to ensure that the product is durable, functional and includes critical features for field use. Unlike some competitive products that require 123 batteries, *Energizer®* Hard Case® Tactical™ lights use AA batteries, which are more readily available in the field and will run on lithium or ordinary alkaline batteries for added versatility.

## ***Energizer®* Hard Case® Tactical™ 2AA Second Generation Handheld Light**

- Compact: 5.6" long, 2.2" wide at the head, 1.5" at the handle
- Survives a 15' drop
- Total Internal Reflection lens
- Rotating 180° head allowing light to be directed where needed
- Six light modes:
  - Bright white, high-intensity LED (70 lumens on high)
  - Red LED for light-discipline and combat conditions
  - Blue LED for light-discipline and medical applications
  - Green LED for light-discipline and map-reading
  - Infrared (IR) light for use with night-vision devices
  - IR strobe for Identify Friend or Foe (IFF) capability
- IR and Lockout modes prevent other light sources from operating
- Light runs on two AA batteries, but is fully functional with one AA battery when necessary

## ***Energizer®* Hard Case® Tactical™ Helmet Light**

- Compact: 3" long, 1.5" wide and weighs only 3.5 ounces
- Four light modes:
  - High-intensity White LED (35 lumens)
  - Blue LED for light-discipline and medical applications
  - Infrared (IR) light for use with night-vision devices
  - IR strobe flashes for Identify Friend or Foe (IFF) capability
- IR and Lockout modes prevent other light sources from operating
- Light can be rotated in 18-degree increments and locked into place
- Light easily detaches from helmet mount for use with other accessories such as a MOLLE vest or Pickatunny system
- Package includes Helmet Light, helmet mount, MOLLE vest mount and battery
- Light runs on one AA battery
- *Energizer®* Hard Case® Tactical™ lights are packaged with *Energizer®* Ultimate Lithium batteries, which provide maximum runtime and relevant features:
  - Lightweight – 33% lighter than ordinary alkaline batteries
  - Reliable – Performs in extreme temperatures -40° F to 140° F (-40° C to 60° C)
  - Dependable – Energizer® Ultimate Lithium has a 15-year shelf life
