

Mobile Communication Solutions

From portable battery-powered cell phone and smart phone chargers, to the batteries that power wireless accessories like Bluetooth® headsets, Energizer® has a number of on-the-go power solutions to keep the conversation going anytime, anywhere.

Energizer® Energi To Go® Portable Power for Cell Phones supplies portable battery-driven power to operate the majority of today's power-hungry Smart Phones and

cell phones.

The reusable cell phone power pack is charged by two *Energizer® Ultimate Lithium AA* batteries and provides 235 additional minutes of talk time for smart phones.

The **Energizer® AAAA alkaline battery** is an excellent power source for contemporary electronic devices and wireless accessories because of its small size and light weight.

Energizer® AAAA works with a number of mobile electronic devices, including Bluetooth® Headsets, noise cancelling headsets, portable medical devices and computer accessories.
