

## Energizer® Hard Case® Professional® e-Coupled Swivel Light

Energizer Battery, Inc. is partnering with e-Coupled to deliver advanced wireless power product solutions in portable commercial lighting. Together the companies are introducing a new rechargeable swivel head flashlight that charges through e-Coupled wireless power.

Energizer's rechargeable contractor-grade flashlight works in tandem with the Leggett e-Coupled in-vehicle wireless console charger to give professionals a light that's always charging and always available. This unique product innovation is a perfect accessory for customers within Leggett's commercial vehicle markets such as law enforcement, public safety, telecommunications, military and others such as electricians and contractors.

### Features:

- Flexible: Head rotates 125°
- Durable: Survives a 20-foot drop
- Water resistant
- Operates in 4 different light modes
  - Hi White spot
  - Lo White spot
  - Red night-vision
  - Green inspection
- Sturdy clip attaches to belt or strap for hands-free application
- Flat base allows light to stand on surfaces
- Light runs on a AA rechargeable battery pack
- Energizer will be launching the eCoupled-enabled flashlight in North America in early 2009

Wireless is one of a number of enabling technologies that Energizer views as having great potential in addressing consumers' needs for portability and power - when and wherever they need it.
